

AFP 3.0

The Ferrari for your websites

Put the powerful FoxPro
database engine and
environment onto your
websites —
with AFP!

Save time and money with AFP!

'cause you know the environment and the language - it's FoxPro!

So, your vendor is leaving for .NET, making Apps on the Web? We don't let you down!

You don't have to learn new languages. Use your existing FoxPro classes on the web!

Extend and integrate existing VFP desktop applications with AFP to provide Web capabilities!

>> Stable

High performance and stability for mission-critical environments
Support for clustering and high-availability Web sites.

>> Fast

Based on the fastest PC-database ◉ Handles several million hits per day
No slow COM or ASP calls and no need for ODBC, OLEDB and ADO.

>> Secure

No Files stored in wwwRoot ◉ Code is secure from client presentation
Automatic Session Management.

>> Easy

Easy to learn OO syntax ◉ Easily embedded code in HTML ◉ More than
400 Commands and Functions, even without Microsoft Visual FoxPro IDE.

>> Extensible

Anything goes with PlugIns: WebServices, XML-Support, Encryption...
Extendable with Third party tools (ie. XiTech Cryptor, EPS Voodoo Web Controls,
etc.) and our open Plugin-interface to write your own extensions.

>> Hassle-free

Easy installation and configuration on any ISAPI capable Webserver (like Microsoft IIS,
Apache HTTPd 2.x) on any Windows NT 4.0, Windows 2000, Windows XP or Windows
Server 2003.

**It's your choice: Struggle with .NET
or get your work done with AFP!**

Free support in our newsgroups at <news://news.ProLib.de>, get the tricks at
www.AFPFAQ.de and have discussions with an active AFP community all over the globe.

**AFP 3.0 is
a Webserver
extension for fast
and easy creation
of dynamic
Webpages,
Data-Output and
Forms**

**Download your fully
working testversion!
